Interesting fact 1
In Morocco, it is estimated that there is one dentist for every 800,000 residents, and the standard treatment for a toothache is extraction. At country souks (markets), tooth-extraction specialists are identified by their set of pliers and small carpets littered with bloody molars

Interesting fact 2
Women's rights in Morocco achieved a major step forward in 2004 with the reform of the country's personal status code, the Moudawana. With the reform, women in Morocco can now have custody of their children, the unilateral repudiation of a wife is abolished, and a man's taking of a second wife is subject to the approval of his first wife.

On today's menu:
